To: All Residents, Families, and Staff

**Both Tests Confirmed as False-Positive: No Outbreak**

We have good news. Over the weekend we had positive COVID-19 tests in both a resident and a staff member. However, subsequent re-tests have both **returned as “negative” (clear of the virus)**. This means that both original tests were “false-positives”.

*We are immediately removing our preventative outbreak procedures and returning the Home to “normal” operations, with normal COVID-19 protocols and precautions.*

Thank you for your patience and understanding. Navigating these false-positives is difficult for all of us. We continue to negotiate these extraordinary challenges as best we can.

I want to offer special thanks to our extraordinary team of staff who put in extra time over the weekend as we responded to the original test results and followed Public Health direction.

*Michael O’Keeffe*
