

*Caring together*

June 14, 2022

Dear Residents, Family Members and Staff,

We have been officially cleared from our outbreak by Public Health, effective immediately. Please remember to wear your mask when you go out into the community. Doing so will help prevent another outbreak situation for us.

General visitors are again permitted. Please be sure to call ahead and book a rapid antigen test prior to the visit. We continue to catch unsuspecting positive cases with rapid antigen testing prior to visits.

Thank you for your patience, and a big thank you to the entire Canterbury Gardens team. The quick response and excellent infection control measures resulted in a small, well contained outbreak situation.

Sincerely,

Heather Young  
Executive Director
